

Ideation Phase

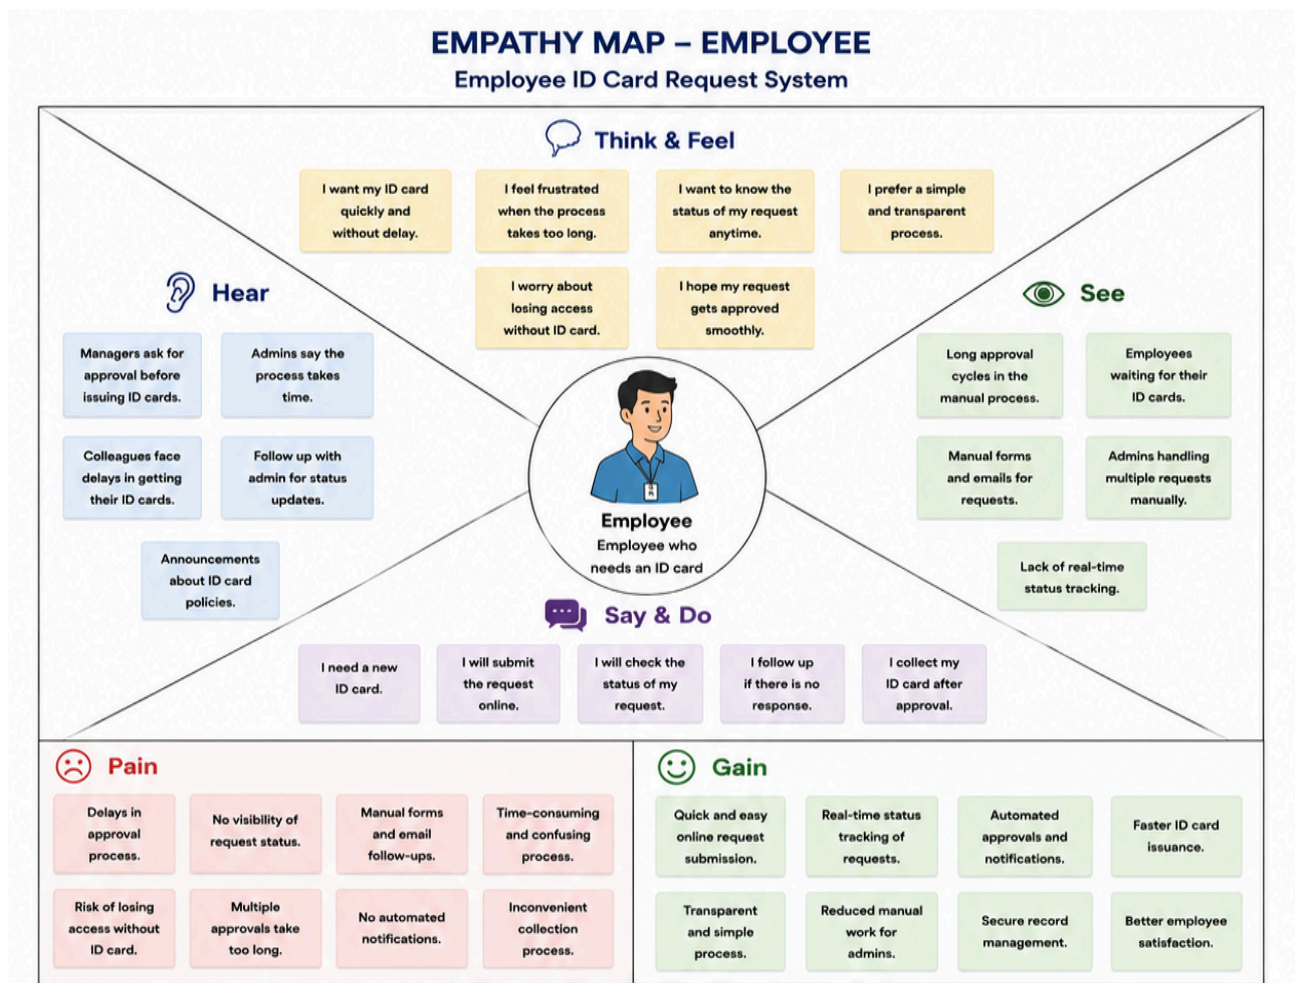

Empathize & Discover

Date	29-06-2026
Team ID	23A51A05P1
Project Name	Employee ID Card Request
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple visual framework that helps understand the needs, thoughts, feelings, and behaviors of users. It provides a clear representation of the user's perspective, making it easier to identify their expectations, challenges, and goals.

Using an empathy map enables better understanding of the people who will use the system and the problems they encounter in their daily activities. By focusing on the user's experience, it becomes possible to design a solution that effectively addresses their needs and delivers a more efficient and user-friendly system.
