

Project Design Phase-II

Data Flow Diagram & User Stories

Date	29-06-2026
Team ID	23A51A05P1
Project Name	Employee ID Card Request
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a graphical representation that illustrates how data moves through a system. It clearly shows the flow of information between users, processes, data stores, and external entities, making it easier to understand how the system processes and manages data.

A well-designed DFD helps visualize the sequence of operations performed within the application, including how data is collected, processed, stored, and delivered. It provides a clear understanding of the overall system workflow and serves as an effective tool for analyzing and documenting system requirements.

User Stories:

USN-1: As an employee, I can submit an Employee ID Card Request through the Service Catalog.

USN-2: As an employee, I can provide my Employee Name, Department, and Reason before submitting the request.

USN-3: As an employee, I can submit the request and generate a Request (REQ) and Requested Item (RITM).

USN-4: As an employee, I can track the status of my submitted ID card request.

USN-5: As an employee, I can receive an email notification after my request is approved.

USN-6: As an approver, I can approve or reject the submitted Employee ID Card Request.

USN-7: As an approver, I can review the employee details before making an approval decision.

USN-8: As an administrator, I can receive a Catalog Task after the request is approved.

USN-9: As an administrator, I can view and manage assigned Catalog Tasks for ID card issuance.

USN-10: As an administrator, I can update the task status after processing the ID card request.

USN-11: As an administrator, I can create and manage the Employee ID Card Request Catalog Item.

USN-12: As an administrator, I can configure catalog variables such as Employee Name, Department, and Reason.

USN-13: As an administrator, I can configure the approval workflow using Flow Designer.

USN-14: As an administrator, I can automate email notifications after approval.

USN-15: As an administrator, I can automate Catalog Task creation for the Admin Team after approval.

USN-16: As an administrator, I can monitor submitted requests, approvals, and task records within the ServiceNow platform.
